Release #44

Volume V

"MT. RAINIER"

MAIN TITLE

Produced by Ford Motion Picture Laboratories
Released through Fitzpatrick & Mc Elroy
Copyrighted 1921 by Ford Motor Company

OCT -1 1921

SUB TITLES

1. Mt. Rainier, in the State of Washington, overlooks Puget Sound.
2. Wonderful roads, through fine forests, lead to Mt. Rainier.
3. Our first glimpse of Mt. Rainier.
4. Mountain Inn is a comfortable place to rest.
5. The snow cap of Mt. Rainier consists of thirty small glaciers.
6. We explore the Nisqually Glacier, beginning at the end of the ice, from which comes a milk white stream.
7. All glaciers are formed from snow banks.
8. A slow moving mass of ice fills the valley and forms the Nisqually Glacier.
9. The stream is formed by the ice melting.
10. We ascend higher and higher to the neve or the snow fields near the top of the mountain.
11. Some of the snow banks are very steep and hard.
12. The walking is very difficult on the higher snow covered slopes.
13. We paint our faces and wear goggles to prevent sun burning. Heavy boots and walking clothes are necessary.
14. This is a welcome shelter after hard climbing.
15. Gibraltar Rock rises in the center, rugged and bold. It is a shelter for us on the way to the summit.
16. The snow decreases as we approach the summit.
17. Mt. Rainier is 14,363 feet high.
18. Mt. Rainier was discovered in 1792 and was sacred to the Indians.
19. Mt. Rainier is easily seen from Seattle and Tacoma. It is an old volcano that still has small steam jets in its crater.

(The End)

This document is from the Library of Congress
“Motion Picture Copyright Descriptions Collection,
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
